

Data Analytics and Risk-Based Quality Management

Data Aggregation, Visualization Tools, and Analytics Software

AcuityMaster provides risk-based and centralized monitoring through simple, flexible solutions. Our seamless, validated, end-to-end risk management platform enables ICH E6 (R2) and regulatory compliance. This solution provides risk identification, evaluation, monitoring, control, and reporting for dynamic monitoring.

Designed and Supported by Industry Experts
Built for Pharma, Biotech, CRO, and Academic Research

AcuityMaster's solutions facilitate cross-functional team collaboration in risk planning and mitigation strategies. Risks are linked to key risk indicators (KRIs) and displayed on dashboards that empower focused monitoring of risks at a subject and site level.

Single solution supporting end-to-end risk management

Continual risk planning and monitoring

Enables central monitoring and site monitoring teams to perform efficient study monitoring

Proactive and timely intervention on issues

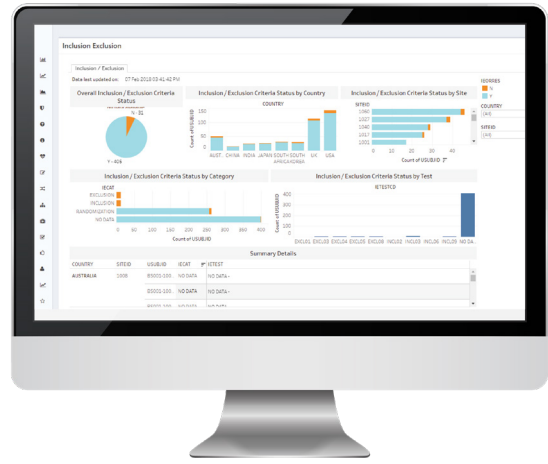

Build your own library of reports/dashboards

Patient Insights

Patient insights are a crucial element of a study's analytical data. Anju provides patient insights through a timely, comprehensive, and interactive view.

- Subject visit compliance
- Detecting potential unreported adverse events based on comed intake and trending of clinical parameters
- Shift of clinical and lab values from baseline
- Protocol compliance
- Dosing and adverse event correlation

Actionable Insights

Interactive data visualizations with system agnostic integration. Offering timely insights.

Operational Insights

Recruitment Rate, Productivity, Turnaround Time, Data Quality - eCRF / Queries, Milestones, Trial Metrics, Drug Accountability

Clinical Insights

Demography, Vital Signs, Laboratory, Physical Examination, Adverse Events, Exposure, Subject Visit

Study Specific Insights

Primary / Secondary Endpoints, Pharmacokinetics, Toxicity

Cross-Study Insights

Cross-study insights that are not only interactive but span different studies within the same program/portfolio level.

Recruitment

Targets, Analysis

Study Conduct

CRF Status, CRF Monitoring, Source Document, Verification, Turnaround Time, Protocol Deviations

Scientific Analysis

Adverse Events, Serious Adverse Events, Lab Outcome, Lab Outcome Analysis, Vitals Outcome

Abnormal Trends

AcuityMaster is a product of Anju.

Anju provides an adaptive platform for clinical trials, medical affairs and a newly designed, state-of-the-art clinical content and data repository. It's an AI-based analytical solution combined with data and application integration capabilities, serving the worldwide pharmaceutical, biotech and contract research Life Sciences markets.
